Invitation to The Danish Association for the Study on Obesity's Educational Day

On behalf of The Danish Association for the Study on Obesity we would like to invite you to participate in our educational day, November 4th-5th, 2021, Nyborg.

We look forward to welcoming international and national speakers, who will present the newest knowledge on hot topics on obesity. They will cover a broad spectrum of topics: we look forward to hearing Professor Jøran Hjelmæsæth, Oslo University, Norway, who will give a talk on health consequences of bariatric surgery and Clinical Associate Professor Esben Thyssen Vestergaard, who will present new knowledge on pharmacological treatment of children with obesity. We also look forward to hearing Professor Berit Heitmann's view on weight loss maintenance, Professor Sten Madsbad's take on pharmacological treatment options of obesity, and Professor Bjørn Richelsen's experiences with surgery both today and in the future. Furthermore, MD Sigrid Bjerger Gribsholt will give a talk on stigmatization.

We would like to invite people with a professional interest in the treatment of obesity who are members of the Danish Society for the Study on Obesity, be it physicians, general practitioners, dietitians, epidemiologists, clinical researchers, nurses etc.

It is a great opportunity to get an update on some of the newest knowledge and of course to network with people with interest in obesity.

On behalf of the board of The Danish Association for the Study on Obesity

Professor Bjørn Richelsen, Professor Jens Meldgaard Bruun, and president of the board, Sigrid Bjerger Gribsholt
